(Artificial Intelligence & Machine Learning)**

Quantum University, Roorkee

Submission Date

25 July 2026

Task: Create a complete website using AI tools for any domain (business, NGO, portfolio, education, etc.)

Objective: To explore AI-powered website creation and understand its practical use.

AI Tool Used: Replit AI

Prompt Used: Build a modern, responsive personal portfolio website for Mnaar, a B. Tech Computer Science and Engineering (Artificial Intelligence & Machine Learning) student.

The website should include:

- Home section with a hero banner saying "Aspiring AI & Web Developer"
- About Me section
- Skills section with HTML, CSS, JavaScript, Python, C++, GitHub, Exploratory Data Analysis (EDA), Data Visualization, Prompt Engineering
- Projects section featuring:
 - NGO Awareness Webpage
 - Tata Group Data Analytics Job Simulation (Forage)
 - AI Web Development Internship Projects
- Education section mentioning B.Tech CSE (AI & ML), Quantum University
- Contact section with placeholders for Email, LinkedIn, and GitHub
- Footer with social media icons

Use a modern blue and white color theme, attractive cards, smooth scrolling, responsive layout, animations, and professional styling. Generate complete HTML, CSS, and JavaScript files and make the website ready to run.

Generated Website

The website was generated using **Replit AI** as a modern and responsive **Personal Portfolio Website**. It features a clean blue-and-white theme and includes multiple sections to showcase personal and academic information.

The website includes the following sections:

- Home
- About Me
- Skills
- Projects
- Education
- Contact
- Footer

Key Features:

- Responsive design for desktop and mobile devices
- Modern user interface with a professional layout
- Smooth navigation between sections
- Project showcase with attractive cards
- Contact section for communication
